

CAMBRIDGE

Guardian Angels

Outstanding care

Complementing World Class Education

The finest schools and colleges in the UK require that their International students under 18 years old have a guardian to provide support in the absence of a locally based parent.

We welcome students when they first arrive in the UK and nurture them for the whole of their stay.

We act as a safe adult in times of emergencies, a point of contact for advice, as well as attending school events on behalf of parents and organizing accommodation for either term time or out weekends and holidays, with our carefully selected, checked and personally matched host families.

We are an established company with AEGIS accreditation, offering guardianship services to International students, recognising the need for a flexible range of cost effective services which range from our comprehensive premium packages for younger students to our reduced range of services more appropriate for older College students who can manage many aspects of their daily lives themselves

The following provides a summary of the services that are provided within each package.
